VII Boundary-Value Problems

51	Boundary-Value Problems	51-1
51.1	Basic Second-Order Boundary-Value Problems	51-1
51.2	Classes of Boundary Conditions	51-3
51.3	Homogeneous and Nonhomogeneous Boundary-Value Problems	51-5
	Additional Exercises	51-6
52	Sturm-Liouville Problems	52-1
52.1	Linear Algebraic Antecedents	52-1
52.2	Boundary-Value Problems with Parameters	52-8
52.3	The Sturm-Liouville Form for a Differential Equation	52-12
52.4	Boundary Conditions for Sturm-Liouville Problems	52-14
52.5	Sturm-Liouville Problems	52-18
52.6	The Eigen-Spaces	52-20
52.7	Inner Products, Orthogonality and Generalized Fourier Series	52-21
52.8	Sturm-Liouville Problems and Eigenfunction Expansions	52-27
52.9	The Main Results Summarized (Sort of)	52-30
	Additional Exercises	52-33
53	Applications to PDE Problems*	53-1
53.1	The Heat Flow Problem	53-1
53.2	The Vibrating String Problem	53-7
	Additional Exercises	53-12
54	Choosing Sturm-Liouville Problems	54-1
54.1	Separation of Variables, Slightly Streamlined	54-1
	Additional Exercises	54-7
